March 25, 2019

Dear Paul's Life Circle:

I am writing to thank you for the very generous and much appreciated donation to the Tuberous Sclerosis Clinic at Cincinnati Children's Hospital. Over the years, Paul's Life Circle has consistently supported the mission of our clinic, which is to improve the lives of children and adults affected by tuberous sclerosis through comprehensive multidisciplinary specialty care and groundbreaking research into new treatments.

The generosity of individuals who know Paul and his family and contribute to Paul's Life Circle is amazing. Many patients come to us from great distances at immense personal cost and sacrifice desperately seeking answers and advice on how to best treat this complicated disease. Others need safety equipment or assistive devices that are not covered by insurance. Support by Paul's Life Circle to the TS Clinic at Cincinnati Children's makes this possible for many who would not be able to do so otherwise. For them, Paul's Life Circle is life-changing.

On behalf of our patients with tuberous sclerosis, we at the TS Clinic at Cincinnati Children's wish to thank Paul's Life Circle for your kindness and generosity. Together, we truly are changing the outcome for tuberous sclerosis, one individual (and family) at a time.

Sincerely,

Darcy A. Krueger, MD PhD
Director, Tuberous Sclerosis Clinic
Cincinnati Children's Hospital Medical Center
